SafeGuard quickly and efficiently sanitises the hands of both people and whatever is being passed through.

Substantially more effective at killing harmful bacteria and viruses than standard household disinfectants and exceeding the performance of alcohol based hand sanitisers.

Hypochlorous provides an instant kill so you can be reassured once applied to the hands the risk of spread is stopped dead.

Easy and quick to use.

True No-touch Operation

No cross-contamination as the system automatically activates when hands are placed inside.

No Drips or Splashes

Makes for a much safer sanitising station area and improves slip risk occurrences. Our sanitiser fluid is very powerful yet kind to the hands, unlike some gels and alcohol based liquids.

Quick to Use & No Drying Time

Fast operation makes SafeGuard much quicker to use sanitising hands in just a few seconds.

Protect Staff & Customers

Reduce staff sickness from cross-contamination from shared items such as keys, mobile phones, and other communal small office items.

Suitable for Everyone

Fully adjustable to suit all ages and abilities.

What is Hypochlorous?

Hypochlorous acid (HOCl) is a weak acid formed via electrolysis that's scientifically proven as a powerful oxidant, effective against invading bacteria, fungi, & viruses.

Hypochlorous acid (HOCL) is entirely organic and harmless if ingested

Water based disinfectant that does not dry out the skin

Scientifically proven effect against bacteria & viruses

Is a ready to use, fragrance free & almost odourless disinfectant

Contains no alcohol & is gentle on the skin

Environmentally friendly
